Professional Summary

Java Full Stack Developer with hands-on experience in Java, Spring Boot and relational databases such as PostgreSQL and MySQL, as well as skills in JavaScript, React and Angular, giving me a holistic view of modern web development.

- Experience in the design and implementation of **RESTful APIs**, authentication systems with **JWT** and c**lean architectures**.
- **Development of complete applications**, from backend to frontend, with a focus on scalability, maintainability and user experience.
- Knowledge of cloud deployment (**Docker, Vercel, Render**) and version control with **Git**.
- **Experience working** freelance and in corporate environments, applying agile **methodologies** and **multidisciplinary collaboration**.
- Motivated by continuous learning, **process improvement** and the **development of solutions** that add direct value to the business.

Education

- **Higher degree:** Web Development Specialising in Blockchain.

- **Full Stack Development - Training**: Udemy Certificate.

- **English - British Council:** B2 Certificate.

- **Master in Java (+180 hrs)**: Udemy Certificate (In Progress).

Technical Competences

- Programming Languages:
Java (Spring Boot), Python (FastAPI), JavaScript, TypeScript.

- Frontend:
React, Next.js, Angular, TailwindCSS, Ant Design, Bootstrap, Framer Motion.

- Backend / APIs:
Spring Boot, FastAPI, JWT, REST APIs, SOAP.

- Databases:
PostgreSQL, MySQL, MongoDB, MongoDB Atlas.

- Cloud & Deployment:
Docker, Vercel, Render.

- Tools & Platforms:
Git, GitHub, IntelliJ IDEA, VS Code, TurboRepo, Figma.

Career Path

Freelance – Java Full Stack Developer
(Oct 2021 – Currently)

Responsibilities and achievements:

- Development of modern, secure and scalable web applications for **task management, e-commerce** and **enterprise applications**, adapted to business needs.
- Creating responsive and accessible interfaces with **Angular, React, TypeScript, TailwindCSS** and **Next.js**, optimised for different devices..
- Implementation of authentication and access control with **Spring Security** and **JWT**, including permissions by role and secure user management.
- Design and development of r**eusable components** and **scalable architectures**, both frontend and backend.
- Development of **RESTful APIs** and data models with **Java**, **Spring Boot** and **relational** (MySQL, PostgreSQL) and **non-relational** (MongoDB) databases, ensuring performance and maintainability.
- Use of **Docker** for consistent deployments and **AWS** (EC2, S3, CloudFront) for scalability, availability and global content delivery.
- Working in collaborative environments with **Git**, **GitHub** and **agile methodologies**, maintaining organised and documented repositories.
- Participation in projects for companies and clients from different sectors, applying a **business-first** and **results-oriented approach**.

Davara & Davara – Full Stack Developer
(Mar 2025 – Jun 2025)

Responsibilities and achievements:

- Development of modern and responsive interfaces with **React**, **TypeScript**, **TailwindCSS**, **Ant Design** and **Next.js**.
- Implementation of **authentication** and **access control** with **FastAPI** and **JWT**.
- Creation of **reusable components** and **scalable frameworks** to improve maintainability.
- Backend collaboration with **MongoDB** and **FastAPI** for endpoint design and data models.
- Teamwork under agile **methodologies** and **version control** with **Git/GitHub**.
- Contribution to **LegalTech** solutions oriented to **RGPD** and **LOPDGDD** compliance.

Relevant Projects - Personal

Developer Portfolio (*React*)

Personal portfolio developed with React, Tailwind CSS and Framer Motion - fast, responsive and fluid animations. Designed to showcase my projects and technology stack, deployed on Vercel for optimal performance.

TaskProX – Project and Task Manager (*FastAPI – MongoDB – React*)

Complete and responsive web application for collaborative project and task management. Includes JWT authentication, role-based permissions, calendar view, Kanban board, file upload and support for dark/light mode.

AlteyaHR - Employee Management System (*Angular – Spring Boot – MySQL*) → In Progress.

Full stack CRUD application for managing employee records. Developed with Angular on the frontend and Spring Boot on the backend, it allows adding, editing, deleting and searching employees, with data persistence in MySQL. It includes responsive interface, clean design and seamless integration with REST API.

Languages

- **Spanish:** Native.
- **English:** B2 – Professional competence, with the ability to work in international environments.

Areas of Professional Interest

- **Development** of scalable and secure **Java applications**.
- Integration of modern **frontend** architectures with robust APIs.
- **Automation** of processes and **deployments in cloud** environments.
- **Continuous improvement** and **agile methodologies**.
