"Software development is not just a job; it's a passion that drives innovation."

Job Application for Full Stack Developer

Dear Mr./Ms./Dr. LastName,

Why me?

Are you looking for someone who can confidently tackle both frontend and backend challenges? I am a Full Stack Developer with hands-on experience in React, Angular, FastAPI, Spring Boot, and databases like MongoDB and PostgreSQL or MySQL. **I've built complete web applications** from scratch — including TaskProX, a collaborative task manager with authentication, permissions, Kanban board, and calendar integration — **demonstrating my ability** to turn complex ideas into functional products.

Why Your Company?

Does your company value innovation, collaboration, and building software with real impact? That's exactly the kind of environment I thrive in. I'm especially drawn to teams that foster creativity, promote continuous learning, and encourage mentorship. What truly motivates me is the challenge of **solving real-world problems**, turning ideas into functional features, and **working with others to build products that matter**—not just technically, but in the value they deliver to **users and businesses**.

Why now?

As I complete my Higher National Degree in Web Application Development, I'm eager to take the next step and apply everything I've learned in a professional environment. Alongside my academic training, I've spent the past few years working as a freelance web developer, delivering full-stack solutions for real clients—ranging from task management platforms to e-commerce sites and enterprise tools.

I've built applications like TaskProX, developed secure backends with Java and Spring Boot, created dynamic UIs with React and Angular, and explored DevOps practices with Docker. My recent internship in the LegalTech sector further reinforced my passion for building scalable, business-driven solutions.\

Now, I**'m ready to bring that hands-on experience**, adaptability, and product-focused mindset to a forward-thinking team—contributing to impactful projects while continuing to grow alongside experienced developers.

Thank you for considering my application. I would be delighted to discuss my qualifications further and explore how I can contribute to your team.

Sincerely,

Alexandro Tellez
