"Software development is not just a job; it's a passion that drives innovation."

About me

I am a **junior developer** with hands-on experience in technologies such as Java, Spring Boot, FastAPI, React , Angular and databases like MySQL, PostgreSQL and MongoDB. **I am passionate** about learning and continually improving, currently expanding my skill set by working on new projects in other languages and frameworks.

My goal is to become a versatile and adaptable developer capable of meeting the diverse needs of companies. I thrive on tackling innovative and challenging projects and enjoy collaborating in dynamic teams. As a self-taught professional, **I am highly adaptable** and eager to learn any language or technology required to contribute effectively to team goals.

Work Experience

- **Personal Projects:**	- **Freelance Projects:**	- **Junior Developer Intern:**
(7-07-2024) - (Present)	(12-2024) - (Present)	(03-2025) - (Present)

Education

- **Higher degree:** Web Development Specialising in Blockchain.

- **Fullstack Development** Training: Udemy Certificate.

- **English - British Council:** B2 Certificate.

Developer Portfolio Projects

- Project 1: Student Management API (Java - Spring Boot): Student Management API is an API for managing a student database, with functionality such as adding, modifying and deleting records.

- Project 2: Spaceship Payload Calculator (Java - Spring Boot): built with java 17, Spring Boot, Maven, PostgreSQL, Docker and Vs code. **This project includes functionalities** such as knowing the weight limit and in the case of exceeding the weight limit, it will be prioritised according to its category until the set weight limit is achieved. Based on 3 main classes: Item, Category and Calculator.

- Project 3: Full-Stack Task Management Application (FastAPI, React and MongoDB): built with FastAPI for the backend, React for the frontend, and MongoDB for data storage. **This project allows** users to manage their tasks efficiently by creating, editing, and deleting tasks, with features designed to improve productivity and organization.

- **Project 4:** Agent IA (FastAPI, React and MongoDB): built with FastAPI for the backend, React for the frontend, and MongoDB for data storage. This project allows users to manage their tasks efficiently by creating, editing, and deleting tasks, with features designed to improve productivity and organization.

Hard and Soft Skills

-- *Hard Skills:*
- **Programming Languages:** Java, Python, TypeScript, JavaScript.
- **Frameworks & Technologies:** Spring Boot, FastAPI, React, Angular, MySQL, PostgreSQL, MongoDB.
- **Tools and Development Environments:** VS Code, pgAdmin, Git, Docker, AWS.

-- *Soft Skills:* Communication, Empathy / Emotional Intelligence, Adaptability, Patience, Curiosity, Self-taught/Continuous Learning, Problem-Solving / Critical Thinking, Time Management, Collaboration / Teamwork.
